APRESENTAÇÃO

A língua brasileira de sinais foi desenvolvida a partir da língua de sinais francesa. As línguas de sinais não são universais, cada país possui a sua. Durante muito tempo, a filosofia educacional adotada para o ensino de pessoas surdas era o oralismo. A partir do Congresso de Milão, em 1880, o método oral puro passa a ser visto de forma diferente, dando espaço para uma nova filosofia que utilizava tanto sinais como o treinamento em língua oral.

Em 10 de novembro de 1993 criou-se a Lei Municipal nº. 2.997 que reconheceu a Língua de Sinais no município de Campo Grande. Em 1996, a Libras foi reconhecida também no Estado de Mato Grosso do Sul, por meio da Lei Estadual nº. 1.693 de 12 de setembro de 1996.

A partir da homologação da Lei nº. 10.436/2002, a propagação da Língua Brasileira de Sinais é consolidada, e o Programa Nacional de Apoio à Educação de Surdo vem reafirmar essa necessidade e possibilidade.

A língua de sinais é reconhecida em todo o mundo como um sistema linguístico independente das línguas oral-auditivas, e foi reconhecida por meio do Decreto nº. 5.626, de 22 de dezembro de 2005. Utilizando-se de um canal visual-espacial, a língua de sinais comporta sistemas simbólicos visuais que dão sentido à comunicação e fortalecem os discursos surdos.

Atualmente, a proposta educacional para o surdo é bilíngue e, com isso, há o reconhecimento da Libras, ou seja, da necessidade de que todas as pessoas, surdas ou ouvintes se apropriem da Língua Brasileira de Sinais. O bilinguismo é uma proposta de ensino que propõe acessibilidade à criança em duas línguas (Língua Brasileira de Sinais e Língua Portuguesa) no contexto escolar.

Vários pesquisadores linguistas reconhecem as línguas de sinais de diferentes países como línguas naturais, no sentido linguístico, ou seja, línguas que apresentam as propriedades das línguas humanas.

Segundo Salles (2000), a Libras

é a língua natural do surdo, sua forma de expressar leituras de mundo para depois se passar à leitura da palavra em língua portuguesa. Sendo sua primeira língua denominada - L¹. Os estudantes surdos necessitam explicitar suas idéias, sentimentos, pensamentos na sua primeira língua - a Língua Brasileira de Sinais - L¹ - expressando-se enquanto indivíduo na interação com o mundo. É fundamental que os temas discutidos em aula sejam compartilhados com o grupo, em LIBRAS, pois é dessa forma que as pessoas surdas expressam-se espontaneamente. Somente a partir disso, será possível pensar em um processo de aprendizado da língua escrita. (Salles,2000, p.21)

A Libras é uma forma de comunicação e expressão em que o sistema linguístico é de natureza visual-espacial, com estrutura própria, que transmite idéias e fatos oriundos de comunidades de pessoas surdas no Brasil.

A Língua de Sinais possui gramática constituída por verbos, pronomes, substantivos, adjetivos e outros.

O deficiente auditivo e surdocego, no contexto educacional, deverá ter garantido sua Língua de Instrução (L1), no caso a Libras.

A Língua Portuguesa (L2), torna-se assim, a segunda língua do surdo, que é adquirida da L1 (LIBRAS), em um ambiente que propiciará o aprendizado da mesma de forma adequada utilizando recursos visuais e com o foco voltado para a função social da escrita e leitura.

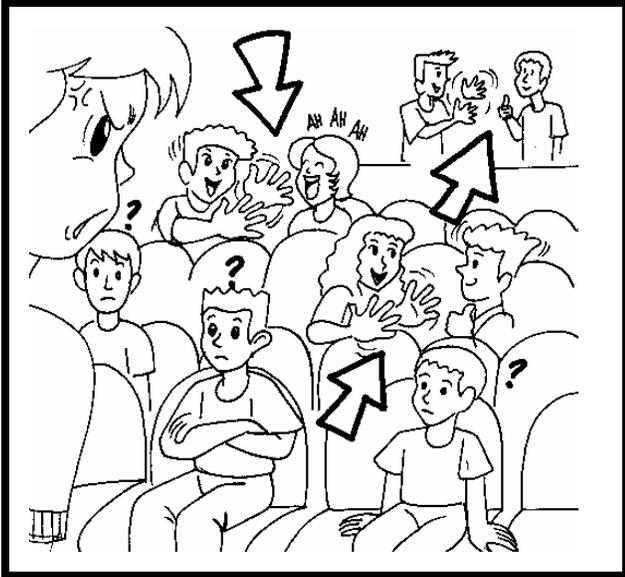

A Libras deverá ser sempre contemplada como língua por excelência de instrução em qualquer disciplina, especialmente na de língua portuguesa, o que coloca o processo ensino aprendizagem em uma perspectiva bilíngue. (Salles 2002).

Assim como outras línguas possuem regionalismo, a Libras também possui, expressões e gírias que são próprias da comunidade surda, por isso pode haver mudança de sinal de um Estado para outro.

Por meio da fluência em Libras, o estudante terá condições de entender a organização da Língua Portuguesa e suas peculiaridades, tendo assim, aprendizagem significativa.

Esta apostila foi elaborada com o objetivo de subsidiar os cursos de Língua Brasileira de Sinais – Libras da Rede Estadual de Ensino de Mato Grosso do Sul. Tem finalidade pedagógica e não pode ser utilizada para fins comerciais.
Reprodução autorizada desde que citada a fonte.

Comunicando em Libras – situações

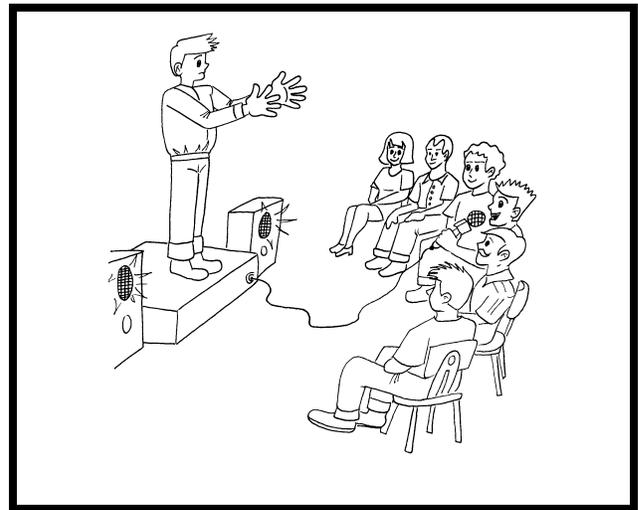

Em palestra que o palestrante é ouvinte e sua platéia é constituída por pessoas surdas e ouvintes, e não existe a presença do intérprete, as pessoas surdas sentem-se alheias do processo informativo. Por isso, ficam conversando entre os seus pares, estão apenas de corpo presente, sem compreenderem o que está sendo falado.

O uso do telefone como meio de comunicação e de otimização de tempo é fundamental nos dias de hoje. O surdo faz uso dessa comunicação por meio do apoio do intérprete.

Nas reuniões profissionais, escolares, de associações ou empresas a Libras é direito dos surdos.

A utilização do intérprete em palestras, e reuniões garante o direito do surdo ao acesso às informações que serão explicitadas naquele momento.

Comunicando em Libras – situações

No espaço de trabalho onde existem surdos, os comunicados devem ser realizados em tempo real por meio da Língua Brasileira de Sinais, caso a pessoa não tenha conhecimento da Libras utilize um intérprete.

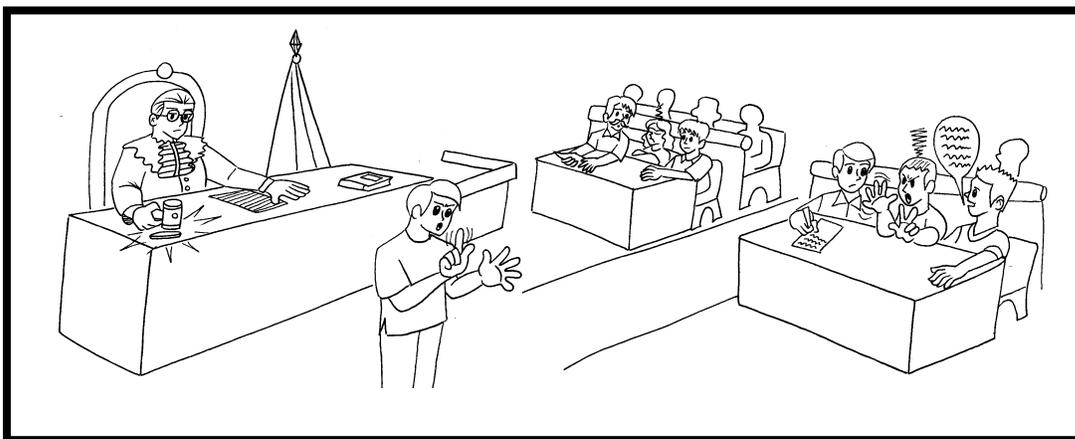

O surdo faz uso do celular para o envio de mensagem. A escrita mesmo que seja em outra estrutura linguística, para eles é inteligível. Quando a pessoa surda manda mensagem do celular para a pessoa ouvinte nem sempre é compreendida em função dessa estrutura linguística.

Ex.

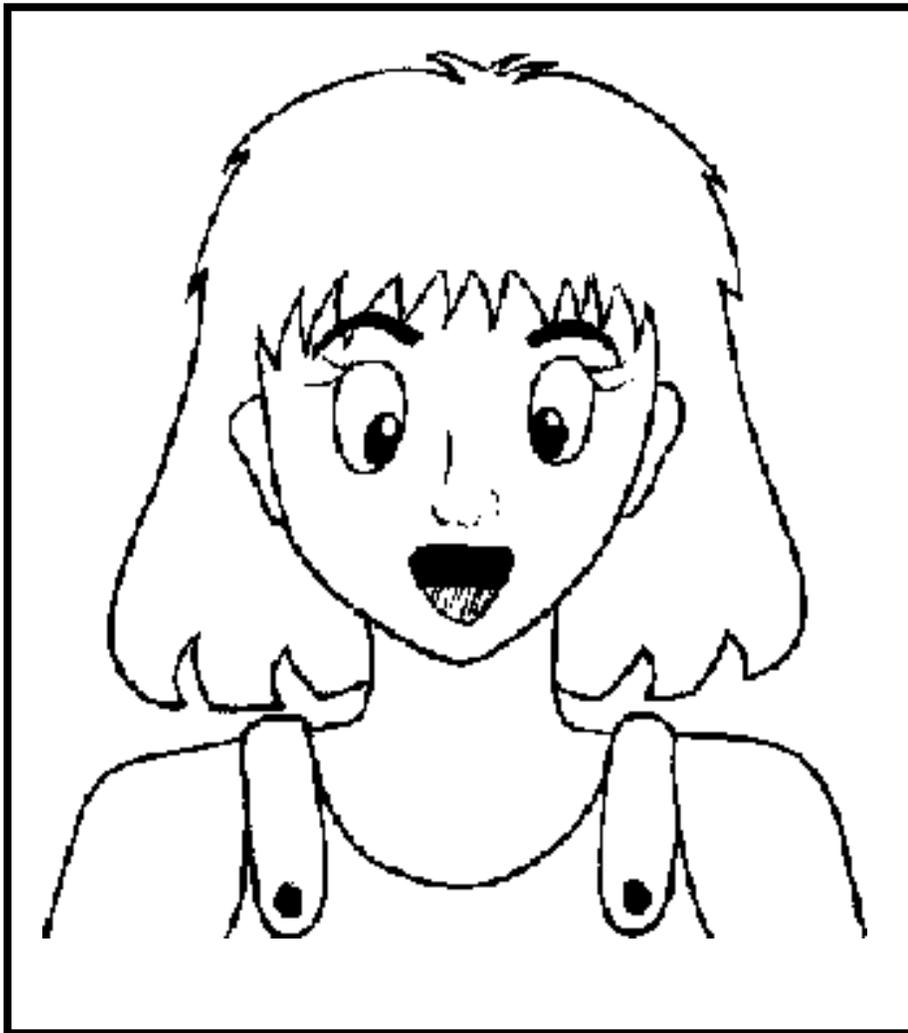

Ola boa noite! Você já conversar para fulano fala qual combinar tem livro do libras já pronto. Ok. m.r?

Tradução: Olá, boa noite! Você já perguntou ao fulano se o livro ficou pronto? Responda-me.

Em Fórum, processos judiciais e afins, os órgãos competentes devem providenciar um intérprete que tenha conhecimento sobre leis para acompanhar os procedimentos. Mesmo assim, a pessoa surda deve levar um intérprete de sua confiança para apoiar e mediar às respostas.

EXPRESSÃO FACIAL E CORPORAL

S - Z - A - S - A - D - J - R - A - S

EXPRESSÃO FACIAL E CORPORAL

No nosso entender a expressão facial e corporal é de máxima importância, não basta apenas fazer o sinal de triste, por exemplo, e na face estamos sorrindo.

Por exemplo, se fizermos o sinal de alegre com uma expressão facial séria o surdo não vai compreender.

O ponto de articulação também é muito importante, temos que fixar nossos movimentos em um ponto só, não ficar mudando para cima ou para baixo.

Movimento: alguns sinais têm movimentos outros não. Como por exemplo, PALAVRA, o sinal não tem movimento, TRABALHAR já tem um movimento com as duas mãos em L para frente e para trás.

O surdo presta muita atenção no visual, não basta apenas fazer o sinal e não ter expressão facial e corporal.

Às vezes só uma expressão no rosto, virando o pescoço e mexendo as sobrancelhas indica: vamos fazer sexo.

Devemos ter sentimentos e expressar emoções ao interpretarmos, pois o surdo, precisa disso para entender. Às vezes, apenas uma expressão basta para o surdo compreender, sem expressão fica difícil e não prende sua atenção.

As expressões facial e corporal são importantes para a vida, mostra sentimentos, já que o surdo depende disso para entender. O sinal sem expressão fica sem sentido e, às vezes, confuso.

Alguns sinais são parecidos, sendo importante a expressão para uma melhor compreensão.

Os surdos se expressam por gestos, necessitando usar o corpo para compreender e ser compreendido.

A expressão do intérprete transmite o tom de quem está falando para o surdo entender se a pessoa está calma, irritada ou gritando. Quando se relata algum fato, o surdo precisa entender se o fato é agradável, engraçado, triste, alegre, bravo, etc.

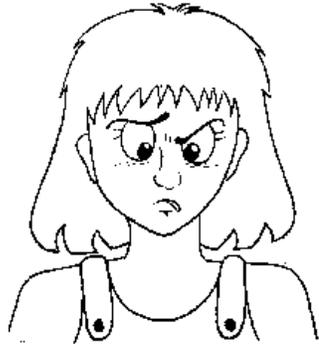

O surdo é totalmente visual; enquanto os ouvintes utilizam a audição para captar mensagens em sala de aula, palestras, etc., o surdo usa apenas a visão para entender o que está acontecendo.

Os surdos se comunicam entre eles com a Língua Brasileira de Sinais com mais rapidez, usando muitas expressões faciais e corporais, tornando-se mais claro, por isso é importante que os ouvintes aprendam a explorar na convivência, essa articulação facilitando a aprendizagem.

PROCEDIMENTO DE LEITURA DO DESENHO

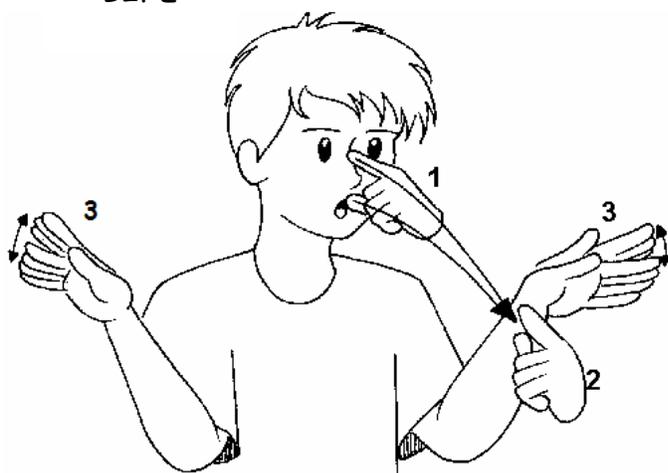

PÃO DE FORMA

Ao observar o desenho fique atento à sequência numérica que ele apresenta, pois o conjunto numérico realizado mostrará o resultado final. Por exemplo: PÃO DE FORMA: 1. Pão. Configuração de mão em A no canto da boca do lado direito; 2. configurar as duas mãos em L; 3. movimento reto para baixo.

BIFE

Os movimentos são feitos rapidamente conforme a sequência apresentada.
